CONTROLS External three (3) position (Low/Stand By/Medium) rocker switch that will offer continuous ventilation. Fantech offers a variety of external controls. (see optional controls)

AIRFLOW BALANCING Screw type dial on electrical box allows supply airflow to be adjusted to match exhaust airflow.

DEFROST During the defrost sequence, a motorized damper temporarily blocks the incoming fresh air stream so that the warm air from the house can circulate through the HRV. The exhaust blower shuts down and the supply blower switches into high speed to maximize the effectiveness of the defrost strategy. During this cycle, household odors from the kitchen or bathroom are prevented from entering the home and the unit will not create negative pressure.

INSTALLATION Unit is typically hung by using installation kit supplied with unit. Mounting bolts provided on top four (4) corners of unit.

SERVICEABILITY Core, filters, motors and drain pan can be easily serviced through latched access door located on front of the cabinet. Core conveniently slides out with ease on an improved railing system. Electrical box, placed on the outside of the unit, can also be easily accessed.

Dimensions & Airflow - All units feature three foot plug-in power cord with 3-prong plug.
