

## **Hafele Range Hoods - Maintenance Information**

### **What is the best way to clean the surface ?**

Regularly wash with warm water, mild detergent and a clean cloth. Clean in the direction of the polish lines. Rinse well with clear water and wipe dry. There are also many specialized stainless steel cleaning products available.

### **How often and how should the filters be cleaned?**

Every 2 months. Take the filter out of the range hood. Put the filter in warm, soapy water, let it soak for a few minutes. Wash, rinse, dry the filter and put it back in the hood or put the filter in the dishwasher.

### **When should the hood be operated?**

Every time the cook top is in operation.

### **How can the halogen bulbs be replaced?**

Press the cup with a screwdriver, open the glass ring and replace the bulb.

### **How can the hood be serviced?**

Contact the 800-number provided on the instruction manual. Our nationwide service company provides phone support to determine the correct solution.
